NITYASHREE SP

Bengaluru, India | +91 8971070781 | nityashreesp02@gmail.com | linkedin.com/in/nityashreesp
github.com/NityashreeSP | Research Intern, IIM Mumbai

SUMMARY

Passionate Computer Science Engineering undergraduate at UVCE (4th year) with a strong focus on Machine Learning. Driven to design and develop intelligent, scalable, and user-centric applications while continuously expanding technical skills through hands-on full-stack development, deep learning research, and building end-to-end AI integrations.

EDUCATION

University Visvesvaraya College of Engineering (UVCE) *Bengaluru, India*
B.Tech in Computer Science Engineering • CGPA: 9.39 (6th Sem)

Sri Vijaya PU College *2021 – 2023*
Pre-University • Percentage: 96.5%

SVMES High School *2020 – 2021*
High School • Percentage: 96.8%

SKILLS

Languages: Python, C, C++, HTML5, CSS3
Web Technologies: Node js, Express js, React js
Databases: MySQL(Basic)
Machine Learning & AI Tools: Scikit-Learn, CNN, LSTM, ResNet18, OpenCV, PyTorch, Transformers, RAG
Core Concepts: Familiarity with OOPS, Computer Networks, DBMS, Operating systems
Soft Skills: Decision-Making, Problem-Solving, Adaptability

EXPERIENCE

IIM Mumbai *May 2026 – June 2026*
Research Intern
GitHub: https://github.com/Namrata-web129/FIRMINDIA.git

- Conducted research on Economic Resilience and Supply Chain Risk Analysis using trade, COVID-19, MSME, and RBI datasets with Python and regression analysis.
- Developed a custom Multi-Agent AI system with Research, Prediction, Policy, Supply Chain, and Advisor Agents for economic decision support.
- Implemented RAG using FAISS, Sentence Transformers, and Google Gemini for AI-powered research insights and recommendations.
- Built machine learning models for economic resilience prediction and policy recommendation.
- Applied methodologies from research on COVID-19 trade disruptions, firm resilience, and supply chain vulnerability to develop an AI-powered intelligence platform.

PROJECTS

ClassVision AI – AI-Powered Attendance Management System
Tech Stack: Python, OpenCV, InsightFace, React.js, Node.js, Express.js, SQLite, JWT
https://github.com/NityashreeSP/ClassVision_AI.git

● Architected a full-stack AI-powered attendance management system integrating real-time face recognition with a web-based platform to automate student identification, attendance marking, and classroom session management.
● Implemented face detection and recognition using InsightFace and OpenCV, with student embeddings and confidence-based matching, while developing React.js frontend and Node.js/Express.js backend modules for authentication, class groups, subjects, sessions, attendance records, and reports.

MakeEasy – AI Travel Intelligence Platform
https://github.com/NityashreeSP/MakeEasy
Tech Stack: React.js, Node.js, Express.js, MongoDB Atlas, Leaflet, OpenStreetMap, Geoapify API, Render, Vercel
● Developed a full-stack travel planning platform with JWT-based authentication, interactive maps, nearby places, hotel search, trip planning, and saved locations using Geoapify and OpenStreetMap APIs.
● deployed a scalable MERN application with secure REST APIs, MongoDB Atlas integration, and cloud deployment using Render (backend) and Vercel (frontend).

CERTIFICATIONS & ACHIEVEMENTS

- Hackathon Participant: Samsung Innovation Campus, CodeFury, Bit N Build, SIH
- Funda Child in India (FCI) Scholar
- Deloitte Data Analytics Job Simulation | Forage Data Labelling Job Simulation
- Udemy Full Stack Web Development Certification

EXTRACURRICULAR ACTIVITIES

- Class Representative – UVCE CSE | Event Coordinator – Tatva Acting Club
- Active Member – Funda Child in India (FCI) | Volunteer – Impetus 2024 & Draw Your Dreams
